

Environmental Policy Statement

It is LC Constructions Policy to plan and execute operations in an environmentally sensitive manner to minimise consequential environmental impacts. Every member of LC Construction is committed to fulfilling our legal obligations and other requirements to which the company subscribes, to ensuring the conservation of natural resources, to the prevention of pollution and the elimination of environmental hazards which may be associated with our operations.

LC Construction Environmental Objectives are:

- To maintain awareness of and to comply with appropriate environmental legislation, regulations and accepted standards and codes of practice.
- To fully meet customer and interested parties stated and/or perceived environmental expectations by the prevention of pollution and the provision of Security Products
- To minimise the environmental impact of operations through reinvestment of new techniques, adoption of the most environmentally friendly way of undertaking our work and employee training in best practices.
- To continually review and monitor all aspects of the company's activities to identify opportunities for implementing improvement of environmental performance.
- To ensure that this policy and supporting processes are understood by and communicated within the organisation and that this policy is available to the public.

Environmental Management implementation is through the IMS which is mandatory in its application. However, its success can only be achieved by the participation and commitment at everyone at LC Construction. All persons working with and for our organisation will receive full support to ensure the IMS is understood, implemented, and maintained throughout.

It is LC Construction responsibility to ensure IMS functions correctly and its effectiveness is maintained through monitoring, control, audit, and review.
